WFS

BRAND IDENTITY SYSTEM · GUIDELINES

One financial view across every entity and operation.

BRAND OVERVIEW

WFS — Wusool Financial System

نظام وصول المالي

A global financial operating system that gives modern organisations a unified view and controlled execution of their financial operations.

These guidelines define version 1.0 of the WFS identity: the approved icon and wordmark rebuilt as precise vector masters, the Concept A colour family, Instrument Sans and Myriad Arabic typography, and a graphic language derived entirely from the icon. They are written for product, marketing and partner teams — and for anyone building with WFS.

CATEGORY

Global financial operating system

WFS connects every financial operation of a modern organisation inside one structured environment — so leadership sees one truth and teams execute under control.

WFS is	WFS is not
A financial operating system	Bookkeeping or accounting software only
Multi-entity, multi-currency by design	A local-market ERP
One record, one workflow, many interfaces	A bank, wallet or payments app
Controlled execution with approvals	An investment or trading platform
Powerful alone, connected when needed	A regional or single-currency product

BRAND IDEA · CONCEPT C

The Unified Financial Field

Entities, accounts, currencies, operations and data sources are separate fields of motion. WFS brings them into one controlled field — a single, precise view.

MULTIPLE FIELDS — CONVERGE — ALIGN — LOCK — ONE FINANCIAL VIEW

Unity
Five blades, one ring. Every part belongs to the whole.

Convergence
All blade edges resolve into one aperture — one point of view.

Control
Built only from circles: measured, repeatable, precise.

Scale
The same geometry works at 16 px and on a 20 m event screen.

Continuity
A closed, rotating system: always operating, never finished.

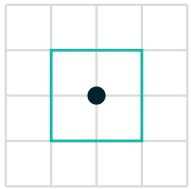

BRAND PERSONALITY

Control · Clarity · Flow · Intelligence

01

Control

التحكم

Every action accountable, every number traceable. Calm authority, never restriction.

02

Clarity

الوضوح

Complex structures made legible. We remove noise before we add anything.

03

Flow

التدفق

Operations move without friction across entities, currencies and teams.

04

Intelligence

الذكاء

Insight that is earned from structured data — never decorative, never hype.

Global · Premium · Enterprise · Intelligent · Controlled · Scalable · Modern · Precise

— and never: loud, playful, speculative, regional, generic.

LOGO CONCEPT

Approved form, rebuilt with precision

The approved icon and wordmark define the geometry and character of WFS. The metallic gold/blue rendering was a presentation effect, not the identity. For version 1.0 both marks were reconstructed as clean vectors and translated into the WFS teal palette.

Icon — five-blade aperture rebuilt from circles only: 10 boundary arcs + 5 biarc edges (G1). Silhouette IoU vs approved art 0.992.

Wordmark — traced at 3× super-sampling, straight strokes snapped to true horizontals/verticals, curves optimised. IoU 0.997.

Colour — gold/silver/graphite materials mapped to Mint, Teal and Deep tones. Old Concept C colours are retired.

Approved reference (raster, concept colours — retired)

WFS master 1.0 (vector, WFS palette)

Material → colour translation

Silver → Mint

Gold → Teal

Bronze → Deep

Graphite → Dark

PRIMARY LOGO · HORIZONTAL LOCKUP

The horizontal lockup — icon + WFS wordmark — is the primary signature. Use it wherever space allows.

The icon leads; the wordmark cap-height is 0.46 × icon diameter and the gap is 0.30 × diameter. Never rebuild the lockup: use the master files.

Default colourway on light grounds. On dark grounds use the Inverse version (page 16).

LOGO ARCHITECTURE

One system, eight roles

Primary

Horizontal lockup. Default for product, web, documents, presentations.

Secondary

Full lockup with descriptor for first contact and formal materials.

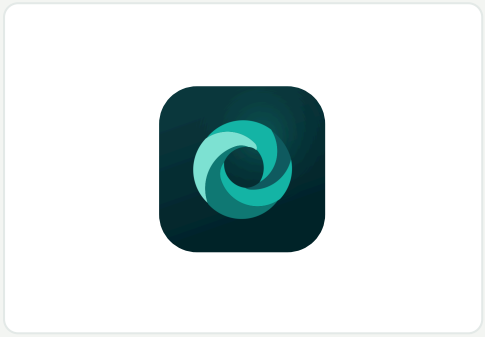

Stacked

Square and vertical formats, splash screens, social avatars (large).

Compact

The icon alone once WFS is established in context (UI, favicons).

App / digital

App icon artwork: dark field, inverse icon, platform-masked.

Monochrome

One colour for single-ink print, forms, engraving, embroidery.

Inverse

Full colour for dark grounds (#022329, #0E3D42, dark imagery).

Premium display

Dimensional version for launch, keynote and event use only.

THE ICON

Five fields. One aperture.

The icon is an aperture of five interlocking blades. Each blade is a curvilinear surface running from the outer field into the central opening — separate operations resolving into one controlled view.

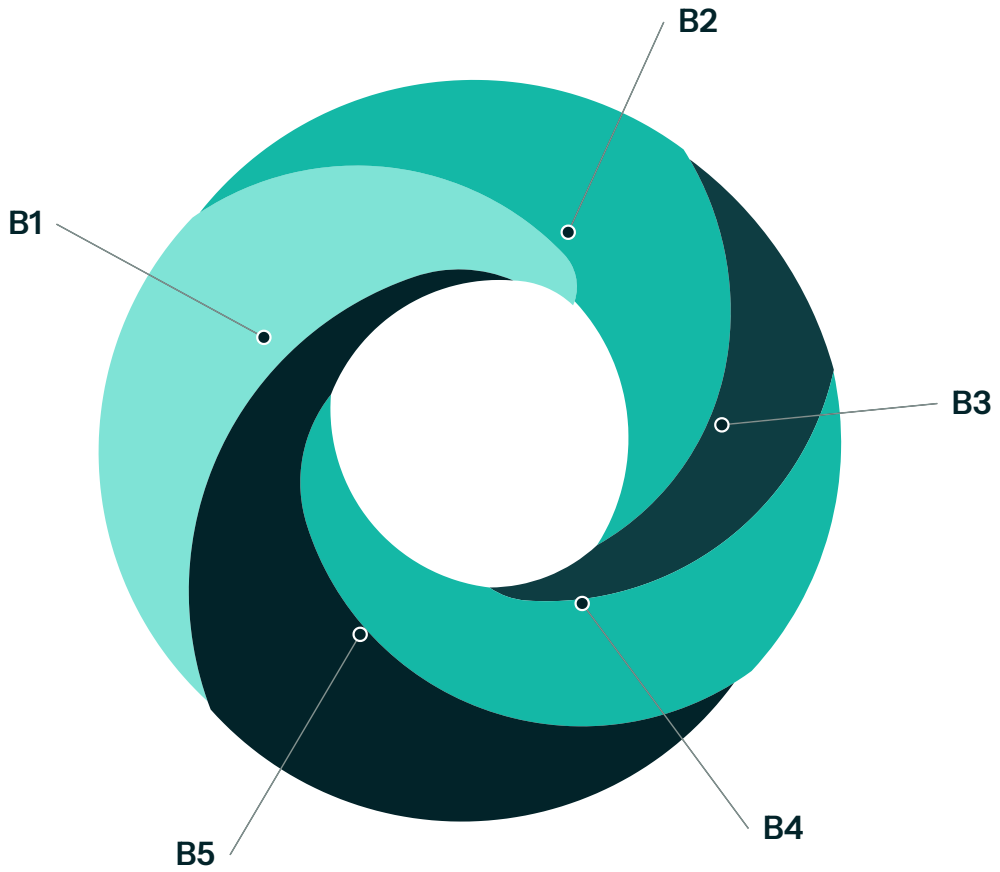

B1 light blade · Mint **B2, B4** principal blades · Teal

B3 shadow blade · Deep Teal **B5** base blade · WFS Dark

Outer silhouette: five arcs (layered, not a perfect circle) — keep it.

The aperture is off-centre by design (+2.1 %, −2.4 % of D).

Blade tips are sharp; never round them.

THE WORDMARK

Custom letterforms — never typeset

Ribbon construction
W, F and S are drawn as continuous folded ribbons: sheared diagonals, a sweeping F bar and an S built from two horizontal bands.

Geometry
Stroke angles 60° / 63.5° / 120° / 123° / 125°; true horizontals and verticals; cap height = 1000 master units; width 4 680.

Relationship to type
Instrument Sans supports the wordmark; it never replaces it. Do not recreate "WFS" in any font.

Colour
WFS Dark (#022329) on light, Off-White (#F3F5F2) on dark. One colour only — the premium version is for display use.

LOCKUPS

Lockup family

HORIZONTAL · PRIMARY

FULL · WITH DESCRIPTOR

Descriptor: Instrument Sans Medium, all caps, justified to the wordmark width. The bilingual descriptor (English + نظام وصول المالي) is produced only with the licensed Arabic font.

STACKED

Icon centred above the wordmark; wordmark cap = 0.40 D, gap = 0.26 D.

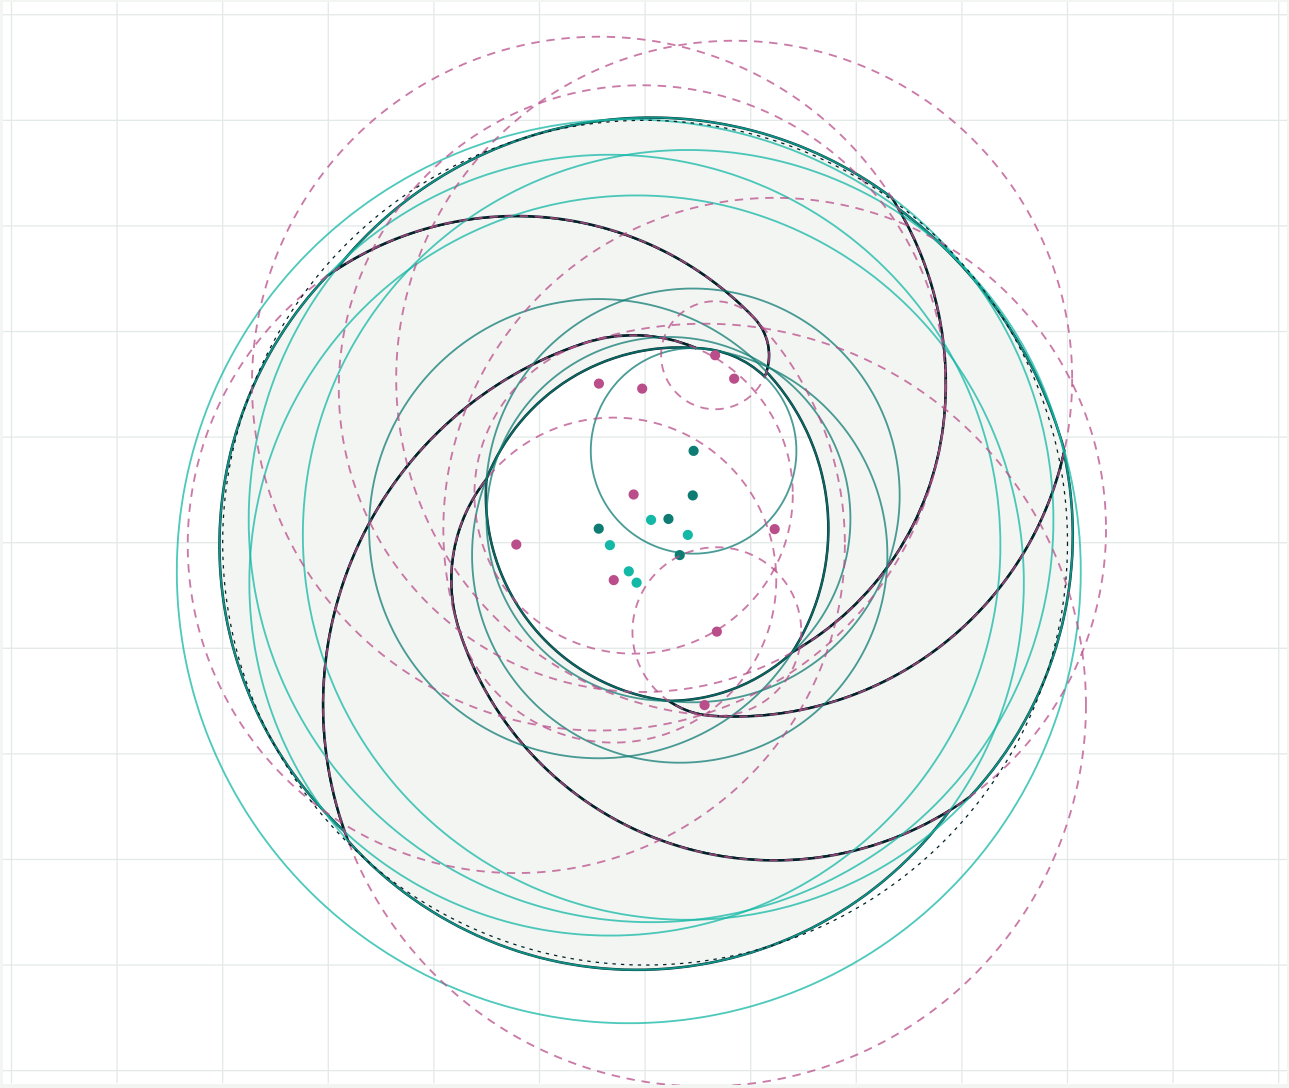

CONSTRUCTION

Built from circles only

Every curve of the icon is an arc of a circle: five outer arcs, five aperture arcs and five blade edges, each a biarc (two tangent arcs). The master is defined on a 1 000-unit diameter grid.

ELEMENT	GEOMETRY	FIDELITY
Outer arcs	5 circles · r 456–535	≤ 0.8 %
Aperture arcs	5 circles · r 122–272	≤ 0.4 %
Blade edges	5 biarcs · 10 circles, G1	rms 0.2–0.3 %
Silhouette	IoU vs approved art	0.992
Aperture	406 × 418 units	= clear-space unit A

Full numeric definition: brand/source/master/icon_geometry.json

CLEAR SPACE

Measured by the aperture

The clear-space unit **A** is the width of the icon's central aperture (0.406 × icon diameter). Keep at least **1 A** free of text, edges and other graphics on every side of any lockup or of the icon.

Minimum: 1 A on all sides.

Preferred (brand-led layouts): 2 A.

UI chrome (headers, nav bars): 0.5 A is permitted when the logo is vertically centred in a bar of ≥ 2.2 × icon height.

Text: body text or headings never enter the clear-space zone; align text to the zone edge, not the artwork.

Because A is part of the icon, clear space scales automatically with the logo — no pixel values needed.

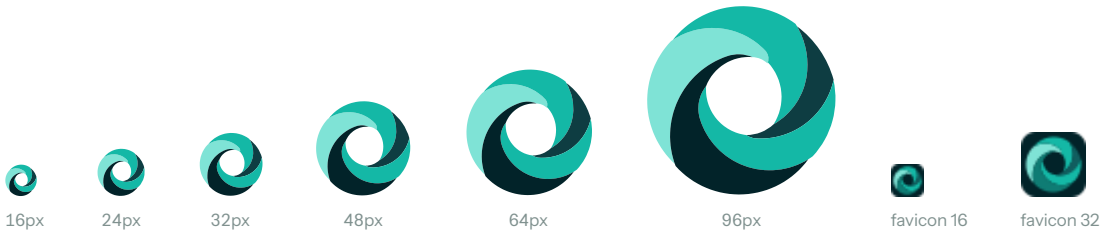

MINIMUM SIZES

Tested, not theoretical

Minimums were set by rendering every version at decreasing sizes and checking that the aperture stays open, blade separation is visible and the wordmark counters don't close. Samples below are shown at their true minimum size (1 px = 1/96 in).

VERSION	ACTUAL-SIZE SAMPLE	SCREEN	PRINT	NOTE
Icon · full colour		16 px	5 mm	Favicon, tabs, dense UI. Below 24 px prefer the favicon tile.
Icon · one colour		24 px	6 mm	16–23 px: use the micro version (gap 56) from the favicon set.
Wordmark	WFS	64 px wide	15 mm wide	Counters in W and S remain open at 64 px.
Horizontal lockup	WFS	96 px wide	25 mm wide	Below this, use the icon alone.
Full lockup (descriptor)	WFS WUSOOL FINANCIAL SYSTEM	220 px wide	55 mm wide	Descriptor cap height ≥ 6 px / 1.4 mm.
App icon		16 px	—	Sizes ≤ 64 px use the compact artwork.

BACKGROUNDS

Choose the version by the ground

Primary on light grounds, Inverse on dark grounds, one-colour versions on colour fields and on busy imagery. On photography, place the logo on the calmest area and keep contrast ≥ 3 : 1 against the local background.

WFS Dark #022329

Deep Teal #0E3D42

Off-White #F3F5F2

White

Black · one-colour white

Primary Teal · one-colour dark

Dark imagery · inverse

Light imagery · primary

COLOUR VERSIONS

Full colour, one colour, greyscale

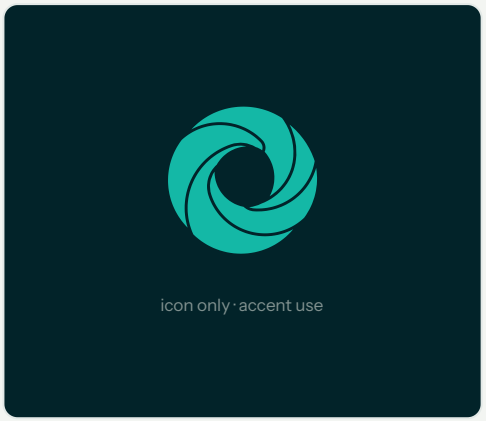

One-colour icons separate the blades with a knockout gap derived from the blade edges (gap = 2 % of D; 3.2 % at 24–47 px; 5.6 % below 24 px). Greyscale versions keep the full-colour tonal order for single-channel print.

Primary

Inverse

Flat teal

Dark

White

Black

Monochrome

Monochrome light

PREMIUM DISPLAY

Depth without decoration

The premium version uses the same master geometry with controlled teal gradients, a key light from the top-right, fine lit edges on the upper blade and in-hue shade on the lower blade at each overlap.

Use for: launch visuals, keynote title slides, event screens, store artwork, hero sections.

Never use for: UI chrome, favicons, documents, small sizes (< 64 px / 20 mm), one-colour print.

No chrome, no glare, no bevel, no drop shadow. No gold or blue.

INCORRECT USAGE

Protect the mark

Do not stretch or distort

Do not rotate

Do not recolour arbitrarily

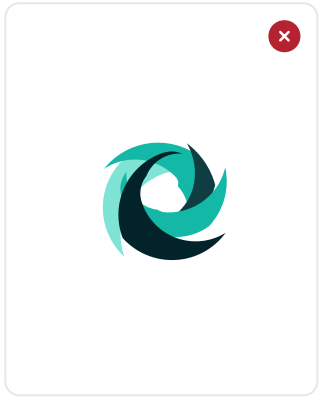

Do not change proportions

Do not alter spacing

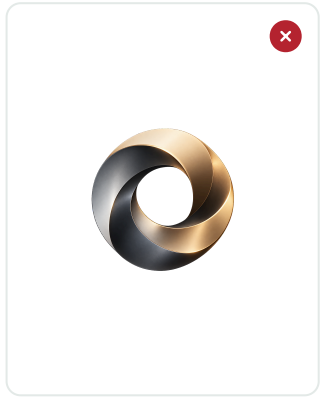

Do not add drop shadows

Do not place on low-contrast grounds

Do not typeset the wordmark

Do not separate the blades

Do not apply random gradients

Do not use retired concept colours

Do not box, outline or badge the logo

Always use the master artwork from brand/logo, brand/icon and brand/wordmark. When in doubt, use the Primary or Inverse horizontal lockup.

COLOUR SYSTEM

Five core colours

The core palette is fixed. Dark teal grounds and a single luminous teal carry the brand; mint lights it; off-white gives it air. Proportions guide every layout: roughly 60 % dark or off-white ground, 25 % deep/neutral surfaces, 10 % teal, 5 % mint.

CMYK values are uncalibrated approximations from sRGB for reference only. Printed colour varies with process, substrate and ICC profile — always proof physically against the HEX/RGB master before production.

DERIVED TONES

Controlled intermediate steps

Derived tones are not core colours. They exist for accessibility, UI states and depth, and are always used next to the core palette.

	Teal 800	#115E5F	Icon dark blade on dark grounds; deep data series.
	Teal 700	#0F7C74	Accessible teal for text/links on light grounds.
	Teal 600	#11998B	Hover / pressed state of Primary Teal.
	Mint 200	#B9EFE7	Tints, selection, chart fills on light.
	Mint 100	#DDF5F1	Subtle tinted surfaces on light.
	Slate 600	#4A5E61	Secondary text on light.
	Slate 400	#80918F	Tertiary text, captions, disabled.
	Line 200	#D6DEDB	Borders and dividers on light.
	Line Dark	#1E4A4F	Borders and dividers on dark.
	Mist 300	#9DB5B3	Secondary text on dark.

DATA VISUALISATION

#11A393 · #3067C9 · #C8691E · #B94E8A — light

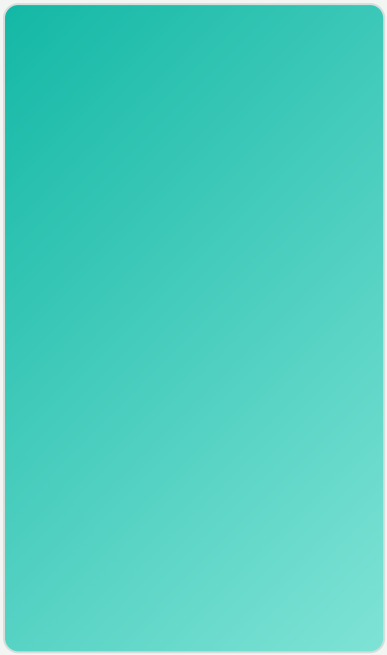

#12A594 · #5A8CE0 · #D6782C · #C95C9E — dark

Validated for lightness band, chroma, colour-vision-deficiency and normal-vision separation, and ≥ 3 : 1 against the chart surface. Assign in fixed order; teal is always series 1.

GRADIENT SYSTEM

Restrained light

Gradients describe light falling on the Unified Financial Field. They use only core and derived teals, move in one direction, and never sit behind body text except the Deep and Light grounds. No rainbow, purple or neon gradients.

Primary Gradient

135° · #14B8A6 0% → #7FE3D6 100%

Accent surfaces, key data highlights, CTA backgrounds on dark. Never behind body text.

Deep Gradient

160° · #0E3D42 0% → #022329 100%

Default dark background for covers, launch screens, presentation grounds.

Light Gradient

180° · #FFFFFF 0% → #F3F5F2 100%

Light page grounds and documents; barely perceptible depth.

Ambient Field

Radial · centre 68 % / 40 % · #14B8A6 28% @ 0% → #0E3D42 0% @ 45% · on #022329

Soft light field behind the icon or hero UI on dark grounds.

Premium Display Gradient

145° · #7FE3D6 0% → #14B8A6 38% → #0E3D42 78% → #022329 100%

Premium display logo, launch graphics and event screens only.

CSS tokens: brand/graphic-system/gradients/wfs-gradients.css · SVG swatches in the same folder.

TYPEFACE · LATIN

Instrument Sans

A contemporary grotesque with precise, slightly condensed proportions — neutral enough for dense financial UI, distinctive enough for display. Open Font License. Four weights only: Regular, Medium, SemiBold, Bold.

Aa Bb Cc Dd Ee Ff Gg
0123456789 %&.,:()

Ag	Ag	Ag	Ag
Regular 400	Medium 500	SemiBold 600	Bold 700

TREASURY · GROUP CASH

Liquidity is consolidated across five entities.

Cash rose 2.4 % to 48,612,480.25 USD. Two payment batches await approval before the 16:00 cut-off.

Caption 11 / 15 · 0	Every entity in view

Print: Display 36–48 pt · H1 26 pt · Body 9–10 pt / 1.5. Max line length 72 characters. Sentence case for headings; caps only for labels.

TYPEFACE · ARABIC

Myriad Arabic

مايرى عربي

The approved Arabic typeface is **Myriad Arabic** (Adobe; PostScript family MyriadArabic-*). Its humanist sans construction pairs with Instrument Sans in stroke contrast, openness and colour on the page.

Arabic runs right-to-left; layouts mirror, numerals and brand names stay LTR.

Set Arabic ~ 1.15 × the Latin size for equal optical weight; line height 1.6.

Never letter-space Arabic; never apply faux bold or italic.

Use Western digits (0–9) in financial UI for global consistency; Eastern Arabic digits only on user locale request.

Arabic specimens in this edition are rendered with a labelled proxy (Noto Sans Arabic) because the licensed Myriad Arabic font file was not available in the build environment. Place the Myriad Arabic files in the font directory and rebuild — the layout switches automatically. The approved Arabic typeface remains Myriad Arabic.

رؤية مالية واحدة لكل كيان وكل عملية.

نظام وصول المالي هو نظام تشغيل مالي عالمي يمنح المؤسسات الحديثة رؤية موحدة وتنفيذًا منضبطًا لعملياتها المالية، عبر جميع الكيانات والعملات والبنوك.

الرصيد النقدي للمجموعة — **48,612,480.25 USD**

NUMBERS ARE THE BRAND

Financial typography

Tabular lining figures (font-feature-settings: "tnum", "lnum") in every table, KPI, statement and chart axis.

Right-align numeric columns on the decimal; fixed decimals per currency (USD 2 · OMR 3 · JPY 0).

Negatives in parentheses in statements; a true minus (−, U+2212) in UI deltas. Colour is never the only signal.

Currency as ISO code after the amount (48,612,480.25 USD); symbols only in local consumer contexts.

Percentages with one decimal and a thin space before % in print; sign always shown for change (+4.9 %).

Large values abbreviate only in charts and tiles (48.6M), never in ledgers.

Hierarchy: KPI values SemiBold, labels Regular in Slate 600, units in Slate 400.

Tabular figures

1,111.11

9,999.99

Tabular figures give every digit the same advance width so columns align and values don't jitter when they update live.

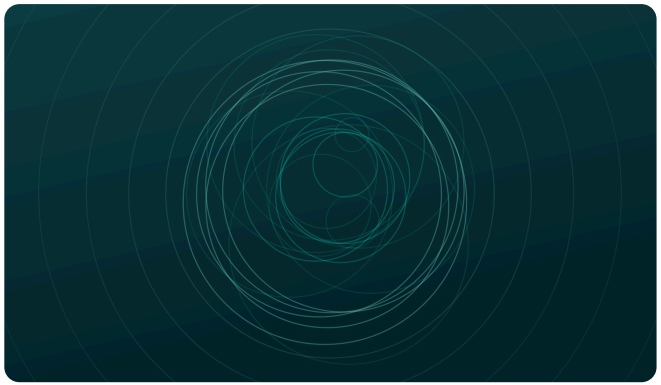

GRAPHIC LANGUAGE

Everything comes from the icon

The graphic system is built from the icon's own geometry — its circles, edges and aperture — so WFS is recognisable without the logo. Use one element per composition, at low contrast, and let content lead.

Fields
Soft light fields in teal on dark or mint on off-white.

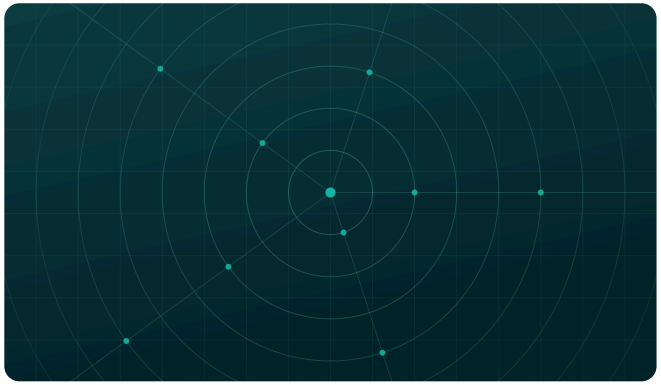

Rings
The 20 construction circles as hairline structure.

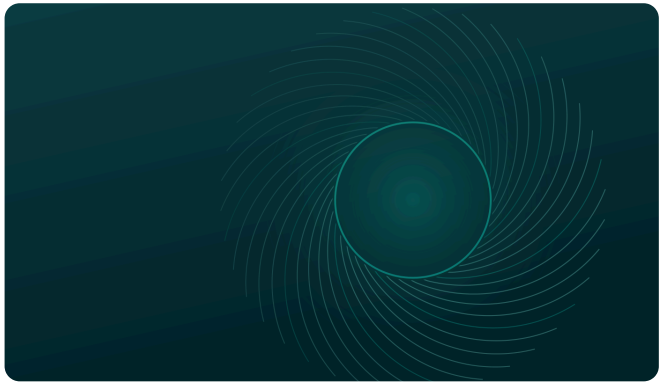

Cropped icon
The icon at architectural scale, cropped by the frame.

Trajectories
Lit blade edges as controlled lines of light.

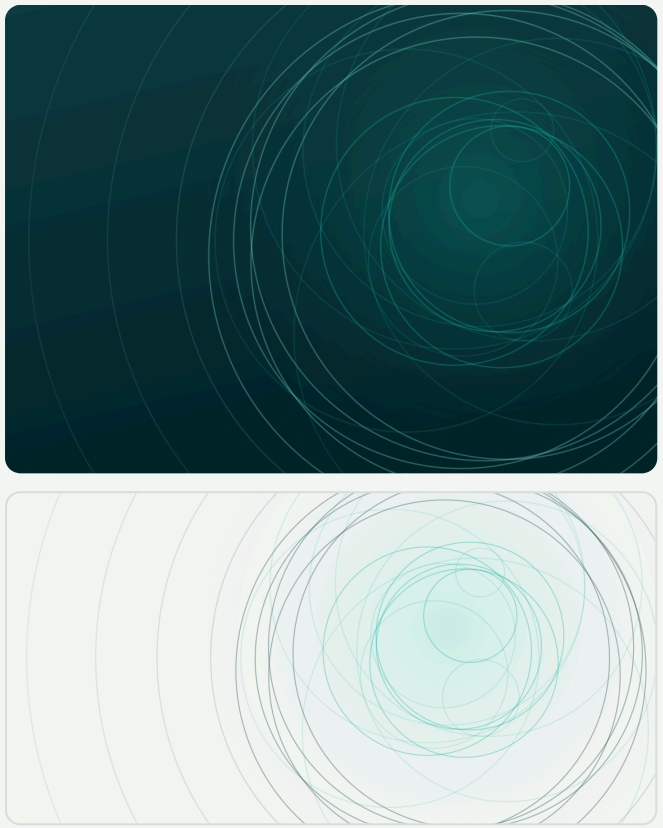

Grid & nodes
Structured grid with five axes and system nodes.

Convergence
Blade edges rotated into one aperture.

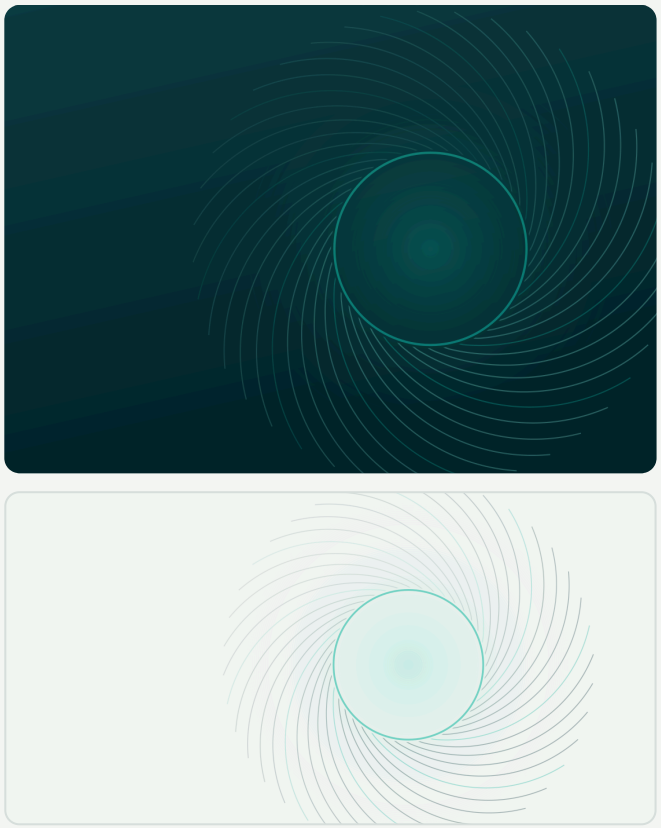

PATTERNS

Three brand patterns

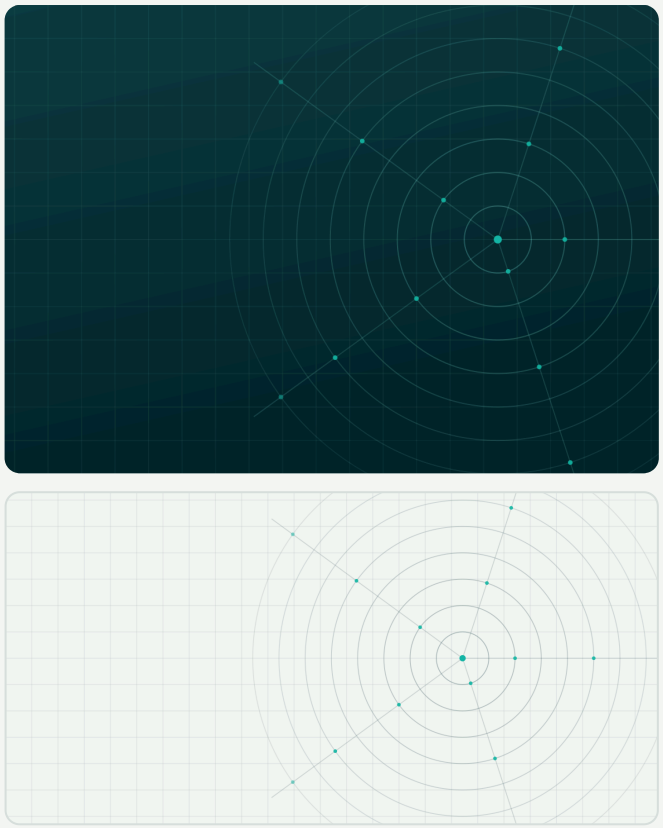

Pattern 01 — Unified Field

The icon's construction circles, extended as a field of near-concentric rings. Covers, presentation grounds, website sections.

Pattern 02 — Financial Convergence

40 blade edges rotated around the aperture. Launch graphics, event screens, hero moments.

Pattern 03 — Structured Orbit

Orbits on a base grid with five axes and nodes. Data, analytics and technical contexts.

Editable SVG (dark, light, seamless tiles for 01 and 03) in brand/graphic-system/patterns. Line weight 1–1.5 px at 1920 px width; opacity 10–35 %.

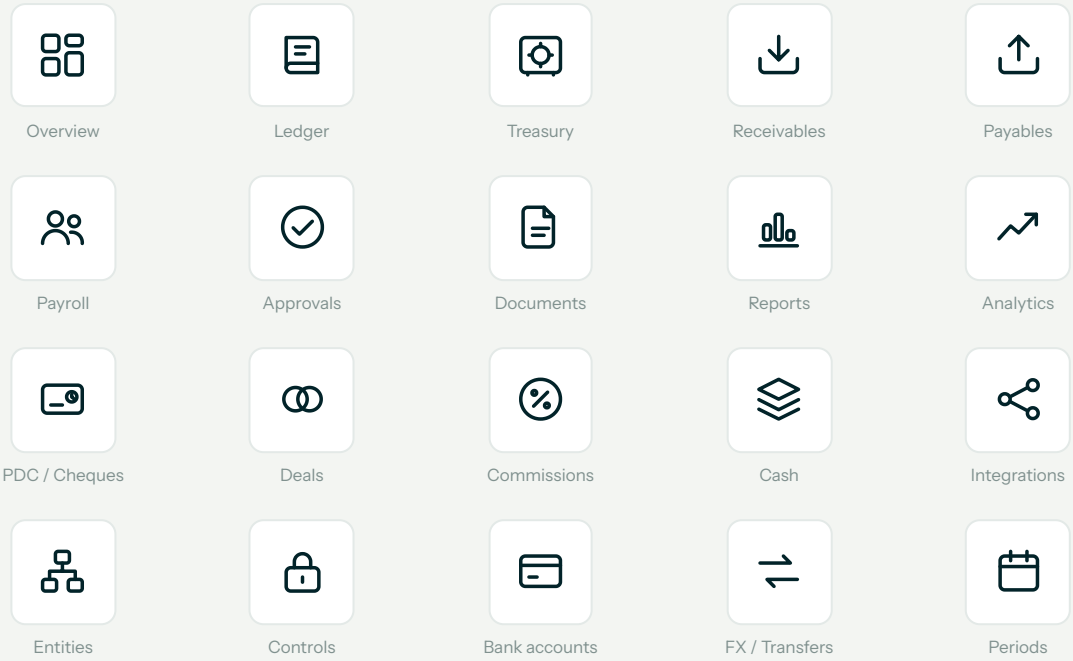

PRODUCT ICONOGRAPHY

Quiet, precise, outline-first

UI icons are functional and deliberately quieter than the brand icon: outline, geometric, one weight. They never reuse the aperture mark or blade shapes.

Grid	24 × 24 px · 2 px padding · live area 20 px
Stroke	1.5 px · round caps & joins
Corners	1–2 px radius on rectangles
Sizes	16 · 20 · 24 px (stroke 1.5 at all)
Colour	Slate 400 idle · Teal 700 active · text colour in content

No coins, dollar signs, piggy banks, bank columns, trading candles or AI sparkles — actions and objects only (receive, pay, approve, reconcile, report).

IMAGERY

Precision, not stock clichés

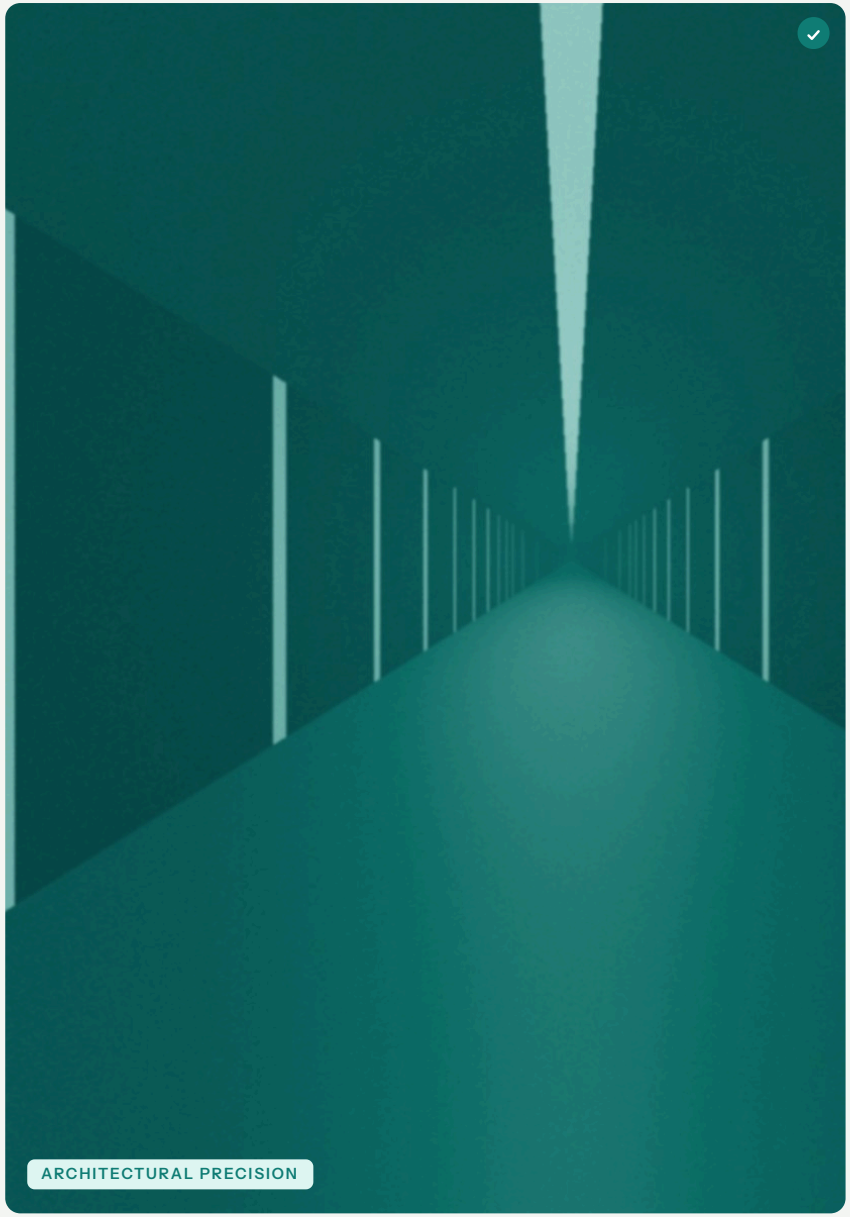

Choose

- Architectural precision, light and structure
- Global infrastructure and networks
- Macro materials — glass, anodised metal, stone
- Real WFS product UI as the hero

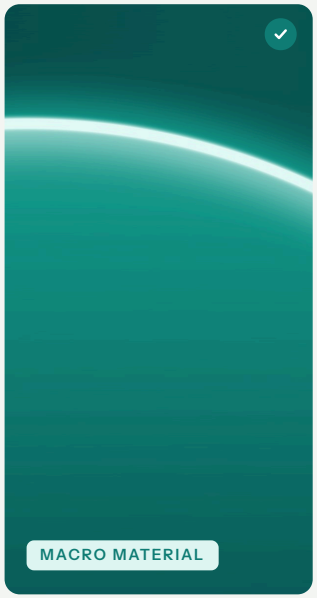

Avoid

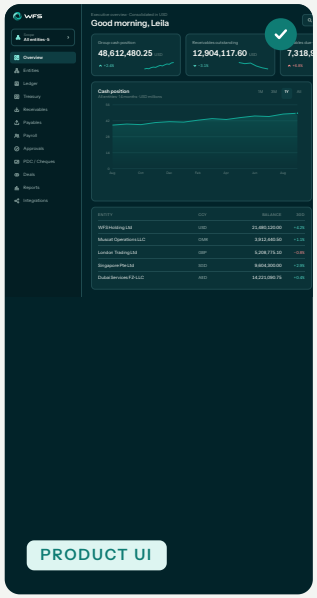

- Handshakes, stock office teams, pointing at screens
- Coins, calculators, cards, bank buildings
- Trading charts, crypto, AI robots or sparkles
- Region-specific landmarks as brand imagery

Grade: cool, low-saturation, teal-shifted shadows, controlled highlights. The frames shown are procedural art-direction renders, not photography — commission or license imagery to these criteria.

MOTION

Converge · Align · Lock

Motion shows many financial fields becoming one view. It is controlled and precise — never bouncy, never chaotic. Blades travel along their own arcs, align to the aperture and lock with a short settle.

Fields 0 ms

Converge 240 ms

Align 520 ms

Lock 760 ms

One view 1 100 ms

TOKEN	VALUE	USE
wfs-ease-standard	cubic-bezier(0.2, 0, 0, 1)	UI transitions, panels, charts
wfs-ease-converge	cubic-bezier(0.65, 0, 0.35, 1)	Logo formation, field convergence
wfs-ease-lock	cubic-bezier(0.3, 1.2, 0.4, 1) · ≤ 4 % overshoot	The lock moment only
Durations	120 · 200 · 320 ms UI · 1 100 ms logo reveal	Never exceed 1.4 s

Principles

- Rotation only around the aperture centre.
- One movement at a time; stagger 40 ms per blade.
- Ring rotation for loading: 360° / 2.4 s linear.
- Respect prefers-reduced-motion: cross-fade only.

Reference prototype: brand/motion/WFS_Logo_Reveal.html (SVG + CSS, no dependencies).

APP ICON

Deep field, luminous aperture

The app icon places the inverse icon on the Deep gradient with a soft ambient field. The master is a full-bleed 1024 px square — platforms apply their own masks; never bake corners into production files.

Master	1024 × 1024 · icon Ø 600 (58.6 %)
Exports	1024 · 512 · 256 · 128 · 64 · 48 · 32 · 16
≤ 64 px	Compact artwork: flat ground, icon Ø 78 %
Android	Adaptive foreground / background / themed monochrome (108 dp)

BRAND ARCHITECTURE

A WUSOOL Tech Product

WFS is an independent product brand created by WUSOOL Tech. The endorsement adds provenance in corporate, investor and partner contexts; it is never part of the primary logo and never borrows WUSOOL Investment styling.

Use: investor decks, partner agreements, press releases, footers, sign-in pages, splash screens.

Don't use: in-product navigation, app icons, favicons, social avatars.

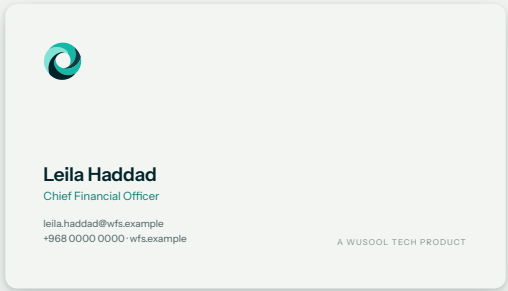

Forms: "A WUSOOL Tech Product" (preferred) · "WFS by WUSOOL Tech" (running text).

Endorsement text: Instrument Sans Medium caps, tracking 0.12 em, Slate 600 / Mist 300, divided by a hairline.

Business card (85 × 55 mm): included only as a reference for the endorsement footer. WFS remains digital-first.

POSITIONING STATEMENT

WFS is a global financial operating system designed to give modern organisations a unified view and controlled execution of their financial operations.

نظام وصول المالي نظام تشغيل مالي عالمي يمنح المؤسسات الحديثة رؤية موحدة وتنفيذًا منضبطًا لعملياتها المالية.

Voice

WE ARE	WE ARE NOT
Precise — numbers, specifics, verbs	Vague, hyped, "revolutionary"
Calm and assured	Loud, urgent, fearful
Global and plain-spoken	Local idiom, jargon, acronyms unexplained
About control and clarity	About speculation, returns, "AI magic"

MESSAGING DIRECTIONS

One financial view.

رؤية مالية واحدة.

One financial truth.

حقيقة مالية واحدة.

Global by design.

عالمي بالتصميم.

Powerful on its own. Connected when you need it.

قوي بذاته. ومتصل عندما تحتاج.

One financial system. Every operation in view.

نظام مالي واحد. كل عملية أمامك بوضوح.

These are messaging directions, not a fixed tagline. Recommended option for the primary tagline: **"One financial system. Every operation in view."** — to be confirmed by WUSOOL Tech leadership.

Arabic specimens in this edition are rendered with a labelled proxy (Noto Sans Arabic) because the licensed Myriad Arabic font file was not available in the build environment. Place the Myriad Arabic files in the font directory and rebuild — the layout switches automatically. The approved Arabic typeface remains Myriad Arabic.

Naming

WFS_[Asset]_[Layout]_[Colourway]_[size]px.[ext] — e.g. WFS_Logo_Horizontal_Inverse_2048px.png

FORMAT	USE
SVG	Master artwork: web, product, and editing (vector, outlined, no embedded images)
PDF	Print & Office; vector, opens as editable paths in Illustrator
PNG	Transparent raster at 512 / 1024 / 2048 / 4096 px where useful
AI	Native .ai requires Adobe Illustrator — run source/illustrator/export_ai.jsx to convert the SVG masters; no renamed files are shipped
ICO / webmanifest	Favicon and PWA integration

The full index with purpose, variant, colourway and background compatibility of every file: brand/WFS_BRAND_ASSET_INDEX.md. Fonts are referenced, not redistributed (see typography/README.md).

Which file do I use?

Website, product UI	SVG
Word, PowerPoint, Google	PNG 2048 · or PDF
Professional print	PDF (vector) · proof colour
Social avatar	Icon PNG on WFS Dark / App icon
Favicon / PWA	icon/favicon set + head-snippet.html
Video, keynote, events	Premium PNG 4096 · SVG
Signage, embroidery	One-colour PDF / SVG

FINAL BRAND PRINCIPLES

Every operation in view.

Unity
One field, one truth. Design every touchpoint as part of the same system.

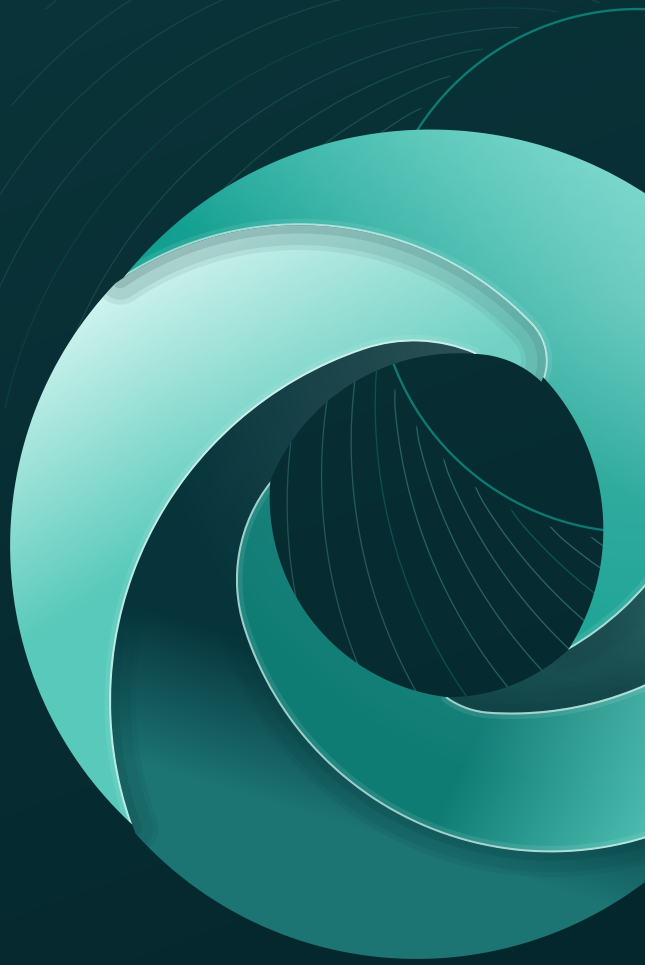

Control
Measured geometry, measured words. Nothing accidental.

Clarity
Structure first. Remove before adding.

Precision
Tabular numbers, exact alignment, honest data.

Global scale
Neutral in geography, fluent in every market.

Intelligence
Insight that is earned, never decorative.
